

LINXIA GONG

Machine Learning Engineer

Authorized to work in Switzerland with permit B, due to family reunion in progress.

 <https://linxiagong.github.io/>  <https://www.linkedin.com/in/linxiagong>  linxiagong@gmail.com  (+65) 8885 4929

EDUCATION

Télécom ParisTech (EURECOM campus) Master's Degree in Communication System Security
 September 2015–September 2017 GPA 3.83/4.0  Biot, France

Zhejiang University Bachelor's Degree in Control Science and Engineering
 August 2011–June 2015 GPA 3.92/4.0  Hangzhou, China

EXPERIENCE

Research Engineer Sea AI Lab, Sea Limited
 Singapore  2021 – Now

Speech and Video Synthesis

- **Speech-driven 3D Talking Avatar Synthesis:** reconstructed 3D representation from source video and animated a talking avatar based on input speech using NeRF and Diffusion model.

Reinforcement Learning Research and Engineering

- **Reinforcement Learning for Combinatorial Optimization:** built a neural combinatorial solver based on Reinforcement Learning algorithms.
- **AlphaStar AI Training:** trained the AlphaStar AI model to achieve an 80% win rate against very-hard built-in AI in StarCraft II.
- **RL Framework Support:** refactored on-policy models into the off-policy framework (ACME) to speed up research projects and support experiments on TPUs and GPUs.

User Modeling Research Engineer Fuxi AI Lab, Netease Games
 Hangzhou, China  2017 - 2021

Anti-Fraud Detection | KDD

- **Anomalous Behavior Detection:** detected cheating players and provide evidence to justify punishments based on sequential behaviors. Paper accepted at KDD'2018.
- **Other Detections:** supported the development of risky trade detection, trajectory detection and hack detection.

Players Matchmaking | KDD,GDC,CIKM

- **Matchmaking Services:** built model-as-a-service APIs that arrange players into teams to maximize their overall engagement in player-versus-player competitions, based on reinforcement learning and combinatorial optimization algorithms. Papers accepted at KDD'2020 and KDD'2021; work presented at GDC'2021.
- **Win and User Engagement Prediction Models:** built models to estimate the matchmaking quality, based on graph embedding algorithms and game theory method (SHAP).
- **In-game Win Prediction and News Generation:** built real-time commenting API service of match status. Paper accepted at CIKM'2020.

PUBLICATIONS

Globally Optimized Matchmaking in Online Games 
Keywords: Game Matchmaking, Combinatorial Optimization, Reinforcement Learning  KDD'2021, 6th author

OptMatch: Optimized Matchmaking via Modeling the High-Order Interactions on the Arena 
Keywords: Game Matchmaking, Graph Embedding, Deep Learning  KDD'2020 (Oral), 1st author

Match Tracing: A Unified Framework for Real-time Win Prediction and Quantifiable Performance 
Keywords: Realtime Win Prediction, Performance Analysis  CIKM'2020, 3rd author

GMTL: A GART Based Multi-task Learning Model for Multi-Social-Temporal Prediction in Online Games 
Keywords: Spatial-Temporal Prediction  CIKM'2019, 2nd author

NGUARD: A Game Bot Detection Framework for NetEase MMORPGs 
Keywords: Anti-Cheat Detection, Behavior Sequence Analysis  KDD'2018, 3rd author

SKILLS

Programming: Python, Cython, SQL, Shell
Data Science: PyTorch, Jax, Keras, Tensorflow, NumPy, scikit-learn
Other Tools: Kubernetes/Ray/Docker, Git, Airflow, HTML/CSS/JS, CI/CD, LaTeX
Languages: Chinese (native), English (fluent), French (intermediate)
